

## WHY ARE INSULATED AND REFRIGERATED STORAGE CONTAINERS FOR SALE IN DEMAND?

### NOWADAYS MANY COMPANIES

have been using insulated and refrigerated containers in various ways. The most widely used downstream fields of insulated containers are:

- Chemicals
- Pharmaceuticals
- Food & Beverages
- Automotive
- Consumer Goods

### REGARDING THE GROWTH OF THE EXPORT AND IMPORT BUSINESS.

Insulated and refrigerated containers are a benediction to all companies who export and import produce as they allow for freshness to last longer.

### INSULATED AND REFRIGERATED CONTAINERS

are insulated with polyurethane insulation and their exterior with aluminum sidings all while being modifiable so that a customer may install lights and even temperature control systems. Such systems allow for heating and cooling within the container at specific temperatures.

Insulated and refrigerated containers can also be powered by diesel generators, which allows for long road or rail journeys for refrigerated goods.
